7 Tactics for 21st-Century Cities

Seven ways for modern cities to innovate.

October 18, 2013 • Abhi Nemani

Be it the burden placed on them by shrinking federal support, or the opportunity presented by modern technology, 21st-century cities are finding new ways to do things. For four years, [Code for America](#) has worked with dozens of cities, each finding creative ways to solve neighborhood problems, build local capacity and steward a national network. These aren't one-offs. Cities are championing fundamental, institutional reforms to commit to an ongoing innovation agenda.

Here are a few of the ways how:

This model failed.

@abhinemani

Agenda

Old Model of a "Smart City"

The "big ideas" over a decade ago...

Open Data Driving Innovation

The rise of open data in the public sector has sparked innovation, driven efficiency, and fueled economic development. While still emerging, we are seeing evidence of the transformative potential of open data in shaping the future of our civic life, and the opportunity to use open data to reimagine the relationship between residents and government, especially at the local level. As we look ahead, what have we learned so far from open data in practice and how we can apply those lessons to realize a more promising future for America's cities and communities?

ST. LOUIS
Regional Data Alliance
CONNECTING DATA FOR COMMUNITY CHANGE

Our Story

Good information — connected, comprehensive datasets about the St. Louis region's health and wellbeing — is often hard to find. The complex data landscape requires public, private, and social sector leaders working together to create a holistic regional data sharing system to improve community health.

Since its launch in June 2018, the RDA has worked hard to address these challenges alongside a growing number of partner governments, universities, funders, nonprofits, healthcare providers, private businesses, and strategic initiatives.

Collectively, these organizations sought to understand, connect, strengthen, and use what the RDA refers to as *community data*, defined as “organized information about community health and development — including but not limited to data from government, healthcare, and the nonprofit sector — that is used to understand a local situation and plan for action.”

takes time & money.

2. Solution Marketplace?

Modeled off of other B2B & B2C marketplaces, the ambition was to increase innovation and competition.

@abhinemani

App Store for Cities?

Market Size: US Government Technology >\$200B Annual Spend

Let's put that in context...

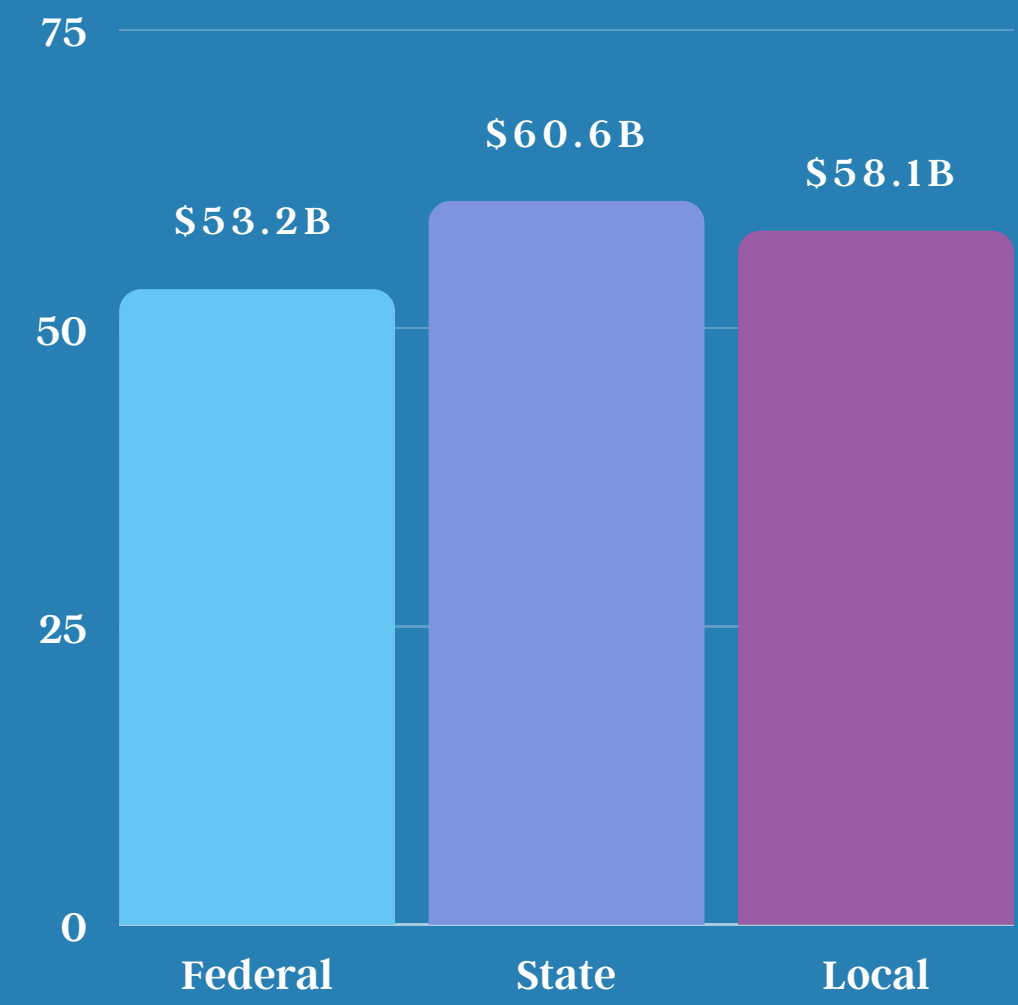

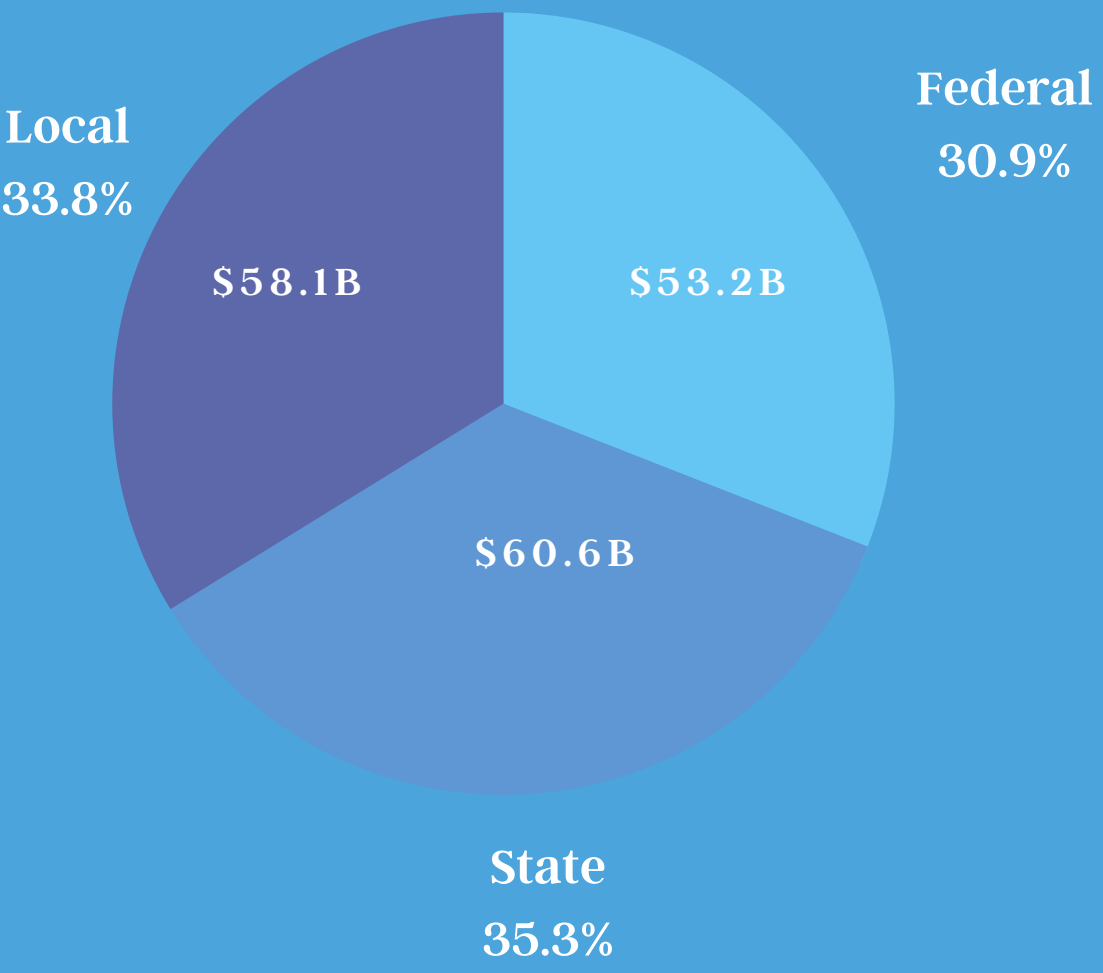

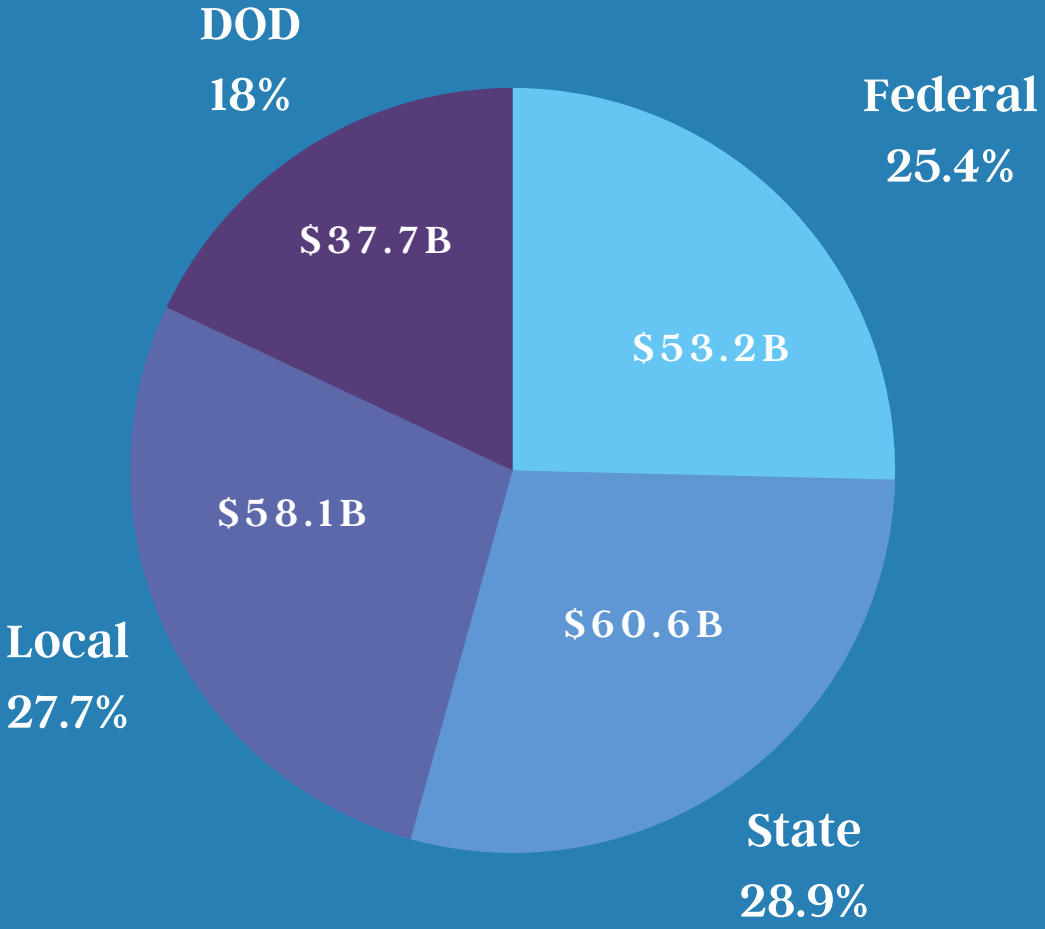

Video Game Industry
\$61B 2020 US Revenue

Wearables Industry
\$42B 2020 US Revenue

State & Local IT vs Federal IT

Breaking it down, taking out National Defense expenditure, which is fairly specialized and less accessible, local and state governments are a bigger opportunity than federal.

*“The future is here.
It’s just not evenly
distributed yet.”*

"When Covid hit, our fastest option was ZenDesk, not a Smart City provider. We had to stand it up in days and cheap."

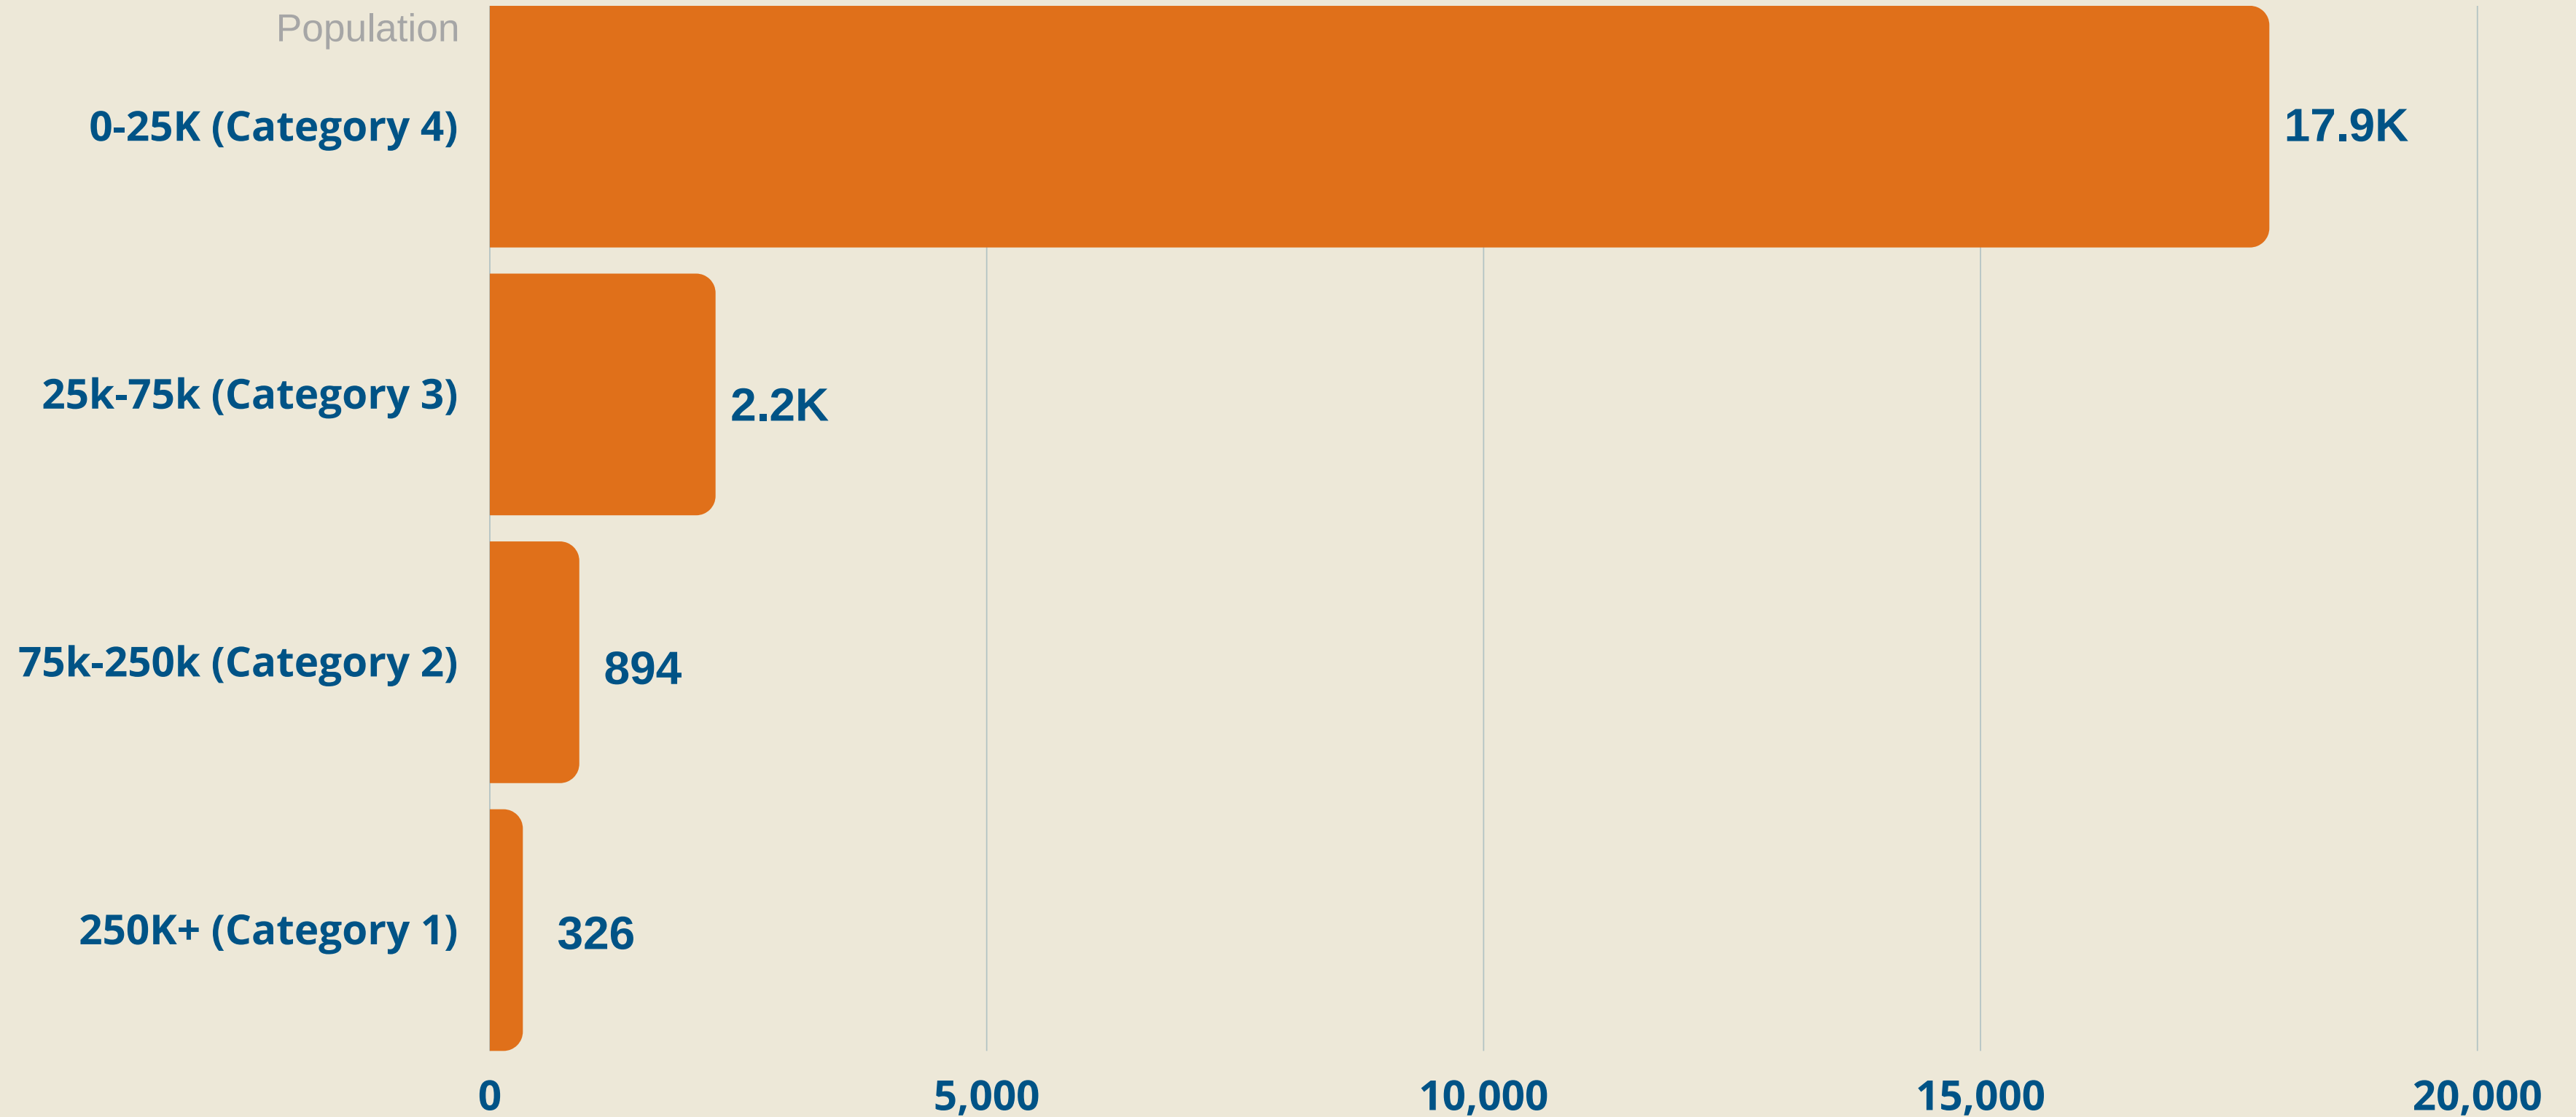

- Small City CIO

Problem 1:
Leaving behind the
little guys

SaaS Adoption is skewed.

Most cities are *small*.

"We need it to be as cheap as SaaS but with the services of a full consulting firm."

- Small City City Manager

*"We need to meet *fast*
revenue metrics for VC &
small cities, one at a time
don't get us there."*

- Smart Cities Startup Entrepreneur

*Smart Cities' Business
Model Problem:
Small Cities*

What you can do

Encourage collaborative access to new tools for **all cities**

- Leverage collaborative purchasing with collective bargaining power (e.g., coProcure, Marketplace.city)
- Enable standards for interoperability (e.g., ID)

A network diagram with several nodes of varying sizes connected by lines, set against an orange background. The nodes are represented by circles, some of which are larger and have a darker center, while others are smaller and lighter. Lines connect the nodes, forming a web-like structure.

Problem 2:
Cities are worried
about cybersecurity.

@abhinemani

Smart Cities Market

Cybersecurity

**#1 Top priority for cities of
all sizes**

@abhinemani

Smart Cities Market

Cybersecurity

#1 Reason Small Cities are looking to SaaS

Lack of Staffing
#2 Reason Small Cities are
looking to SaaS

What you can do

Support Local Leaders Making Mission Critical Decisions

- "State RAMP" equivalent to FedRamp to ensure third-parties stick to standards
- Fund local trainings (e.g., recent cybersecurity EO with \$1B)

*"Just make the damn
websites work."*

- @GSA Carnahan

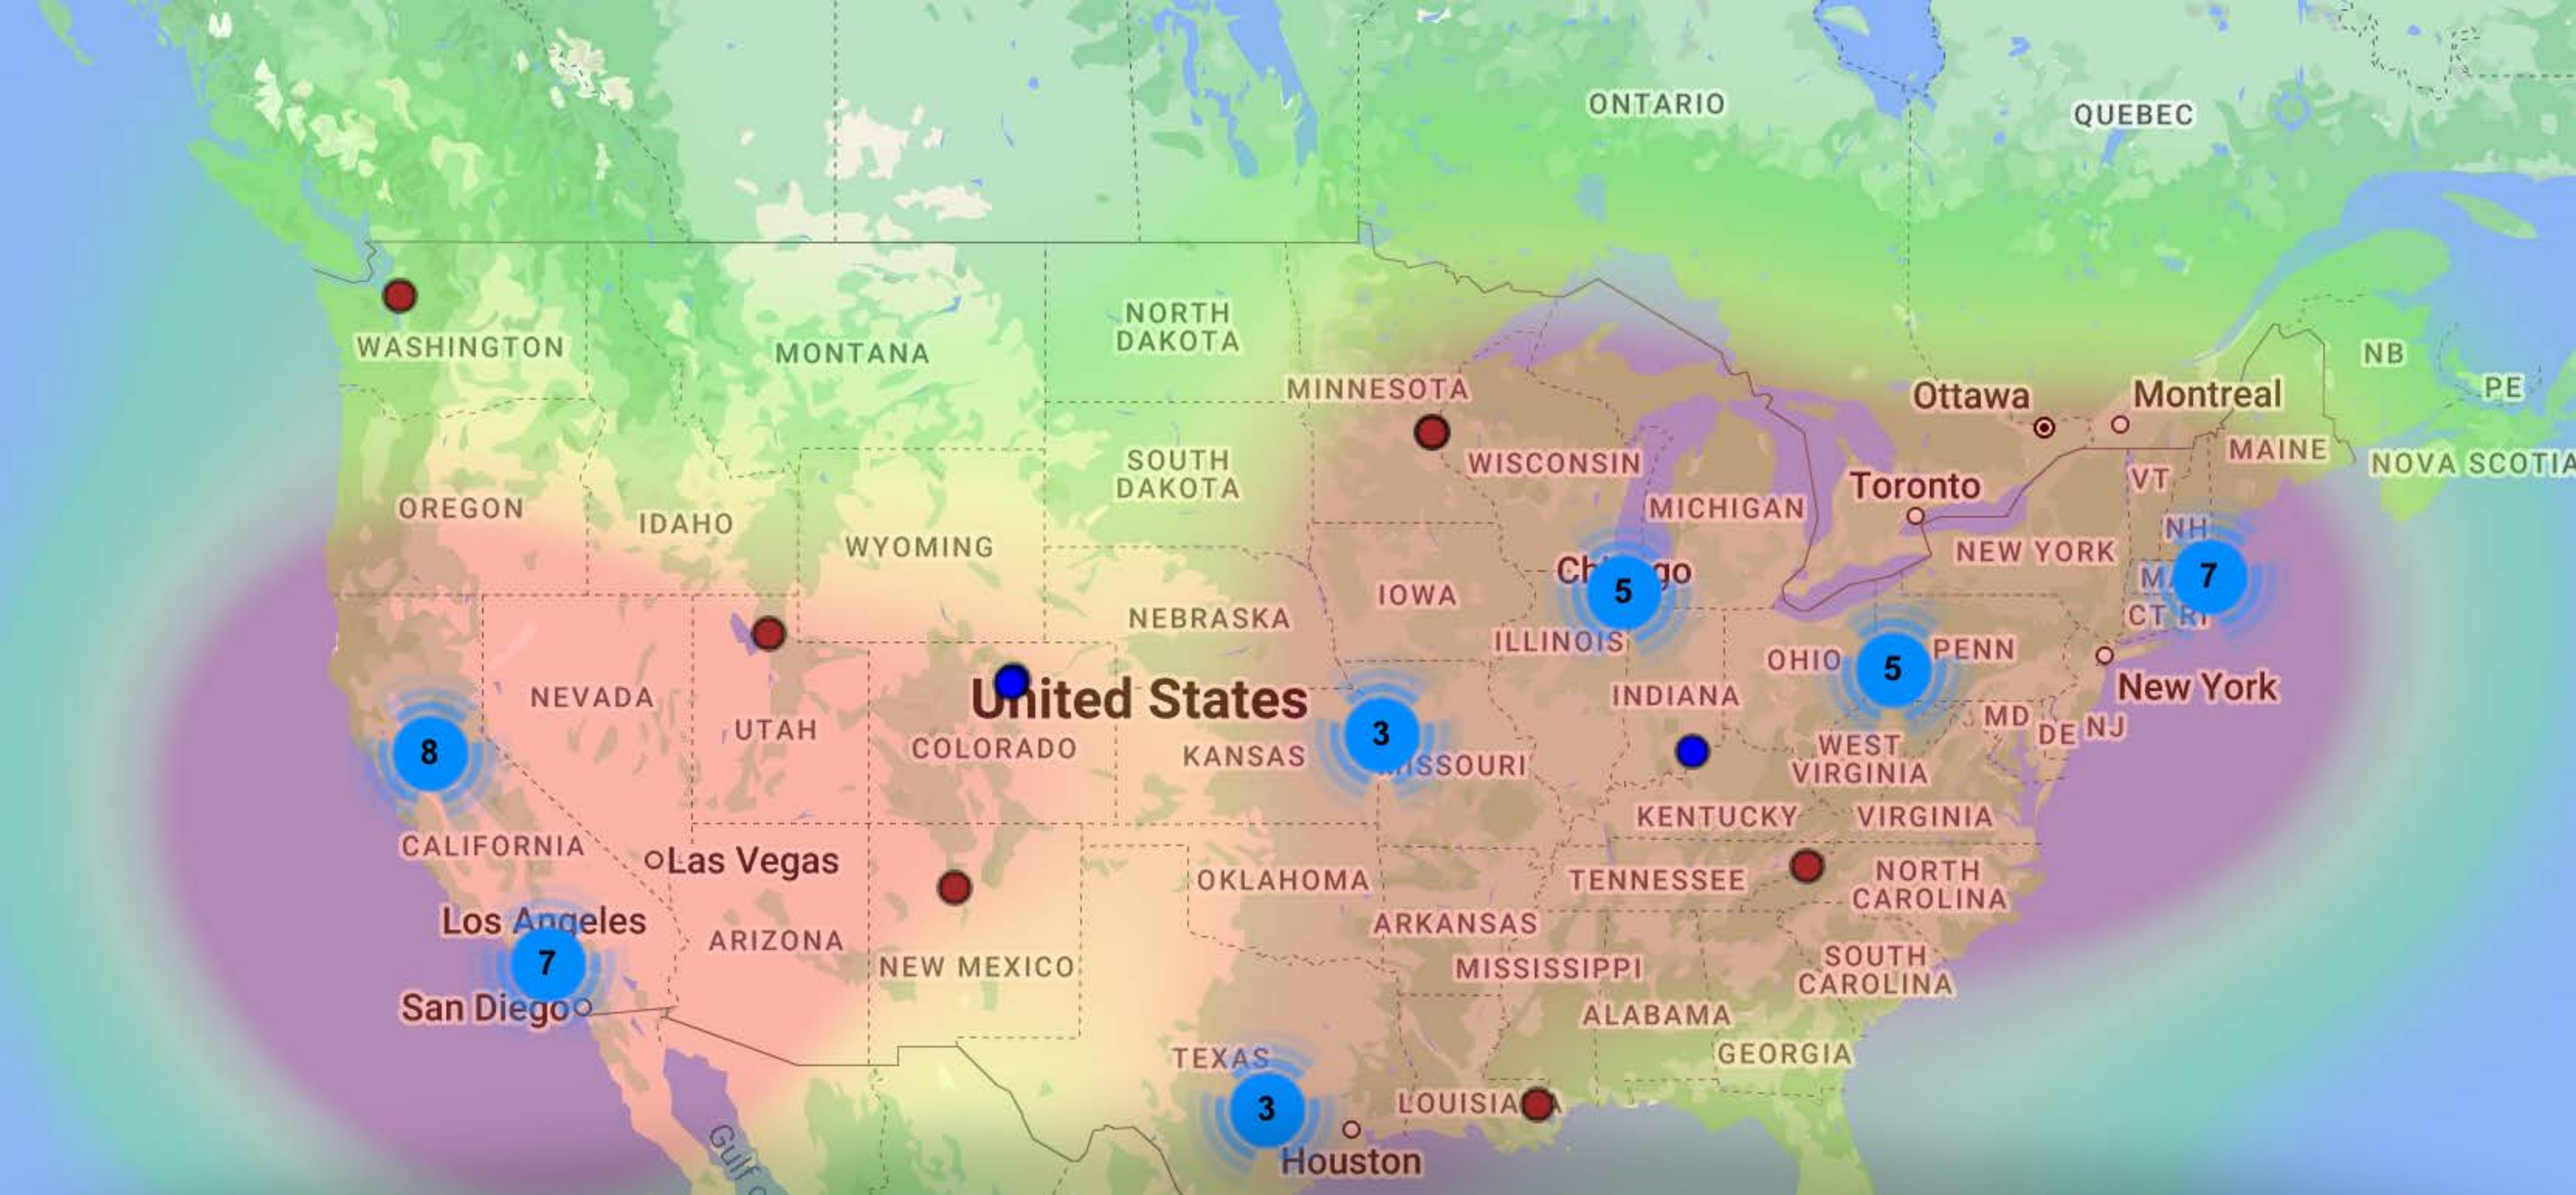

3. New CIOs/CTOs to lead innovation

"Smart cities" sought to bring
in new leaders to change the
culture around innovation.

The "Original" New Urban Mechanics: 2011

Hundreds of cities now have C[x]Os focused on Innovation

Talent Pipeline

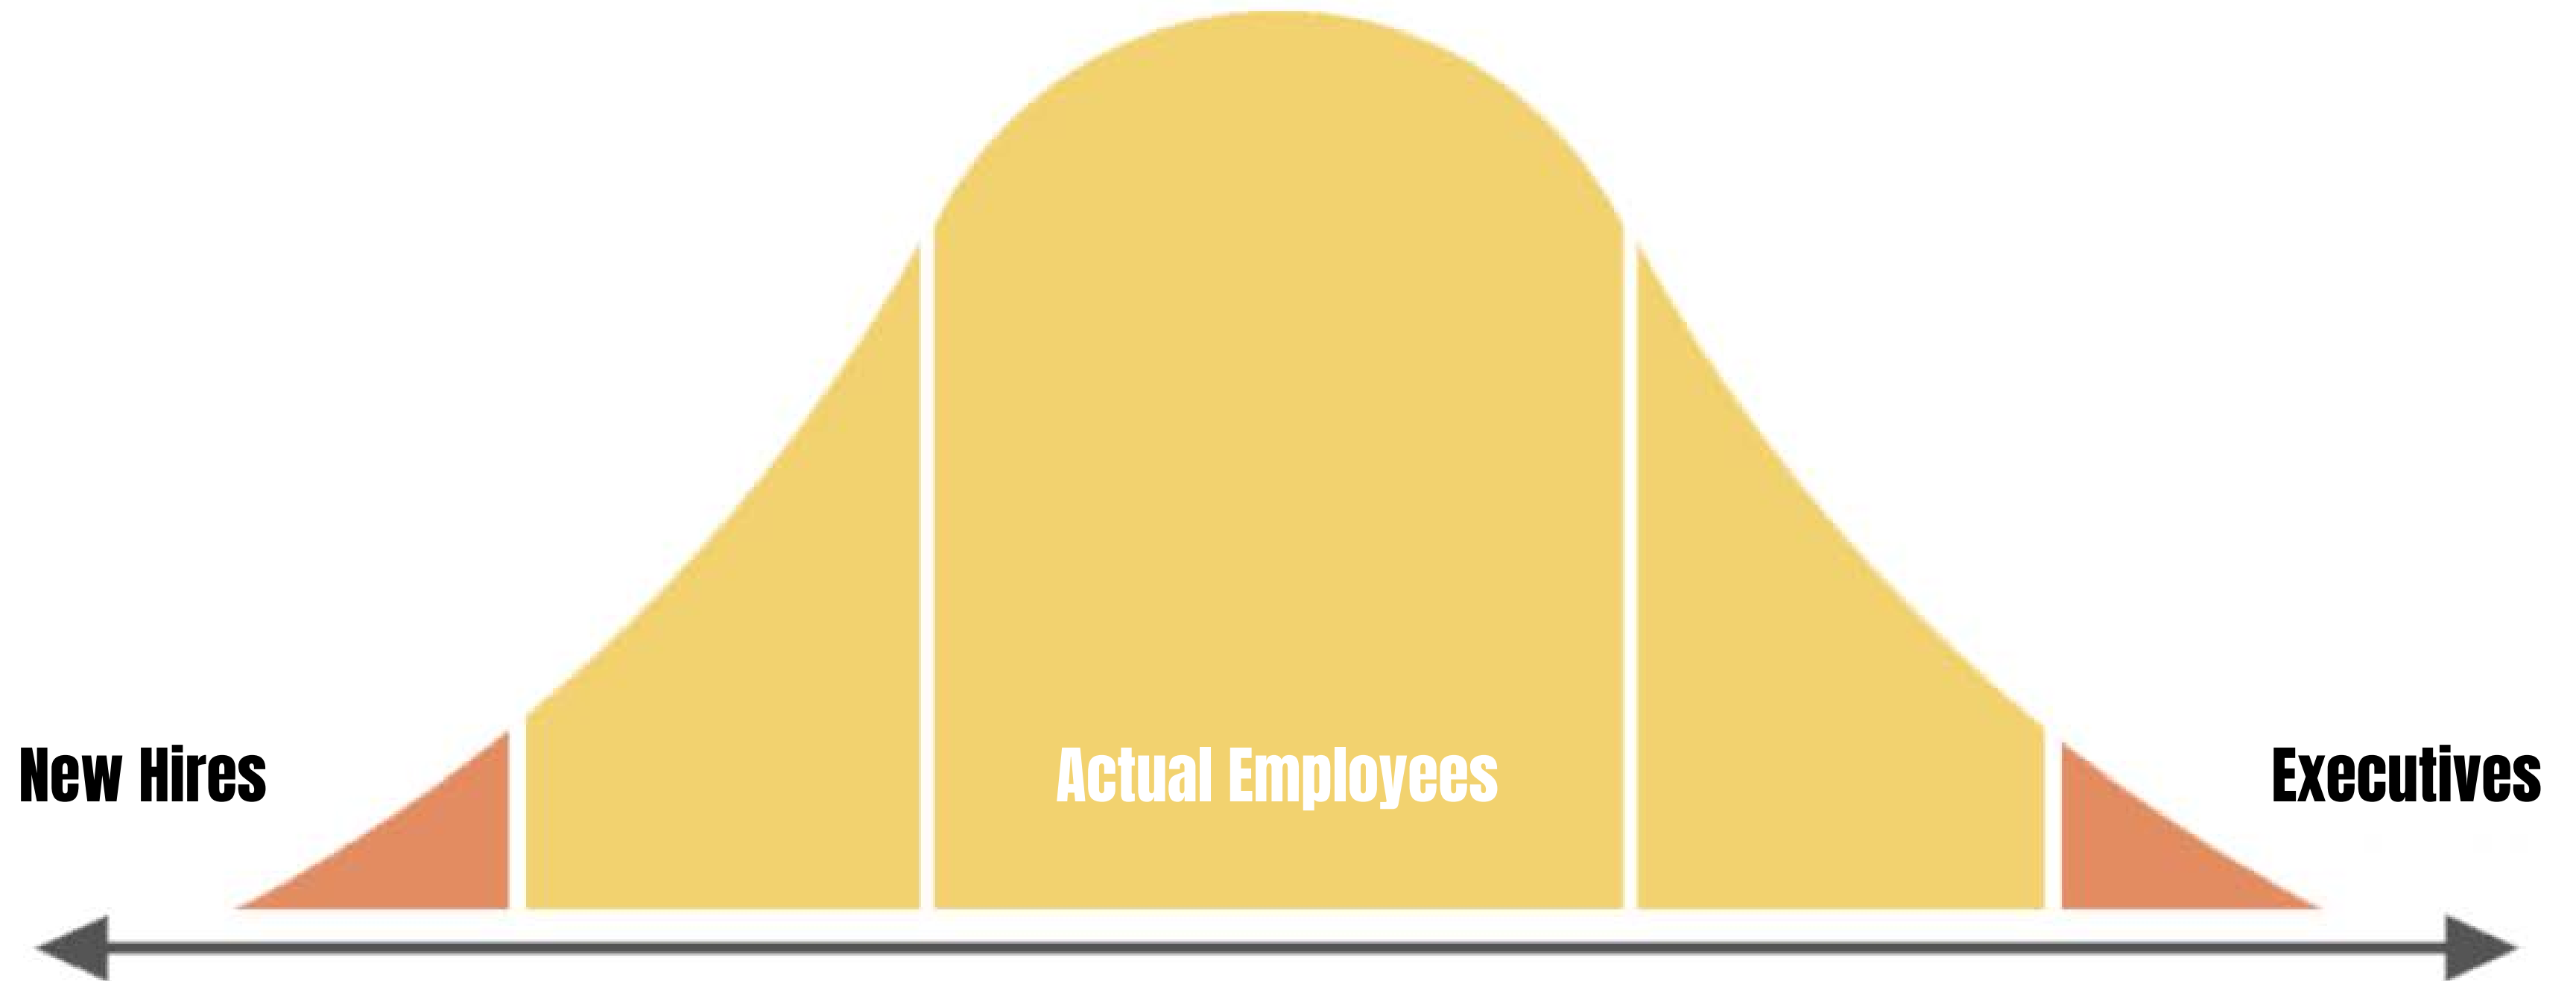

New titles in the "C-Suite"

- Chief Innovation Officer
- Chief Innovation Technology Officer
- Chief Data Officer
- Chief Performance Officer
- Chief Digital Officer
- Chief Customer Service Officer
- Chief Analytics Officer
- Chief Experience Officer
- Chief [X] Officer

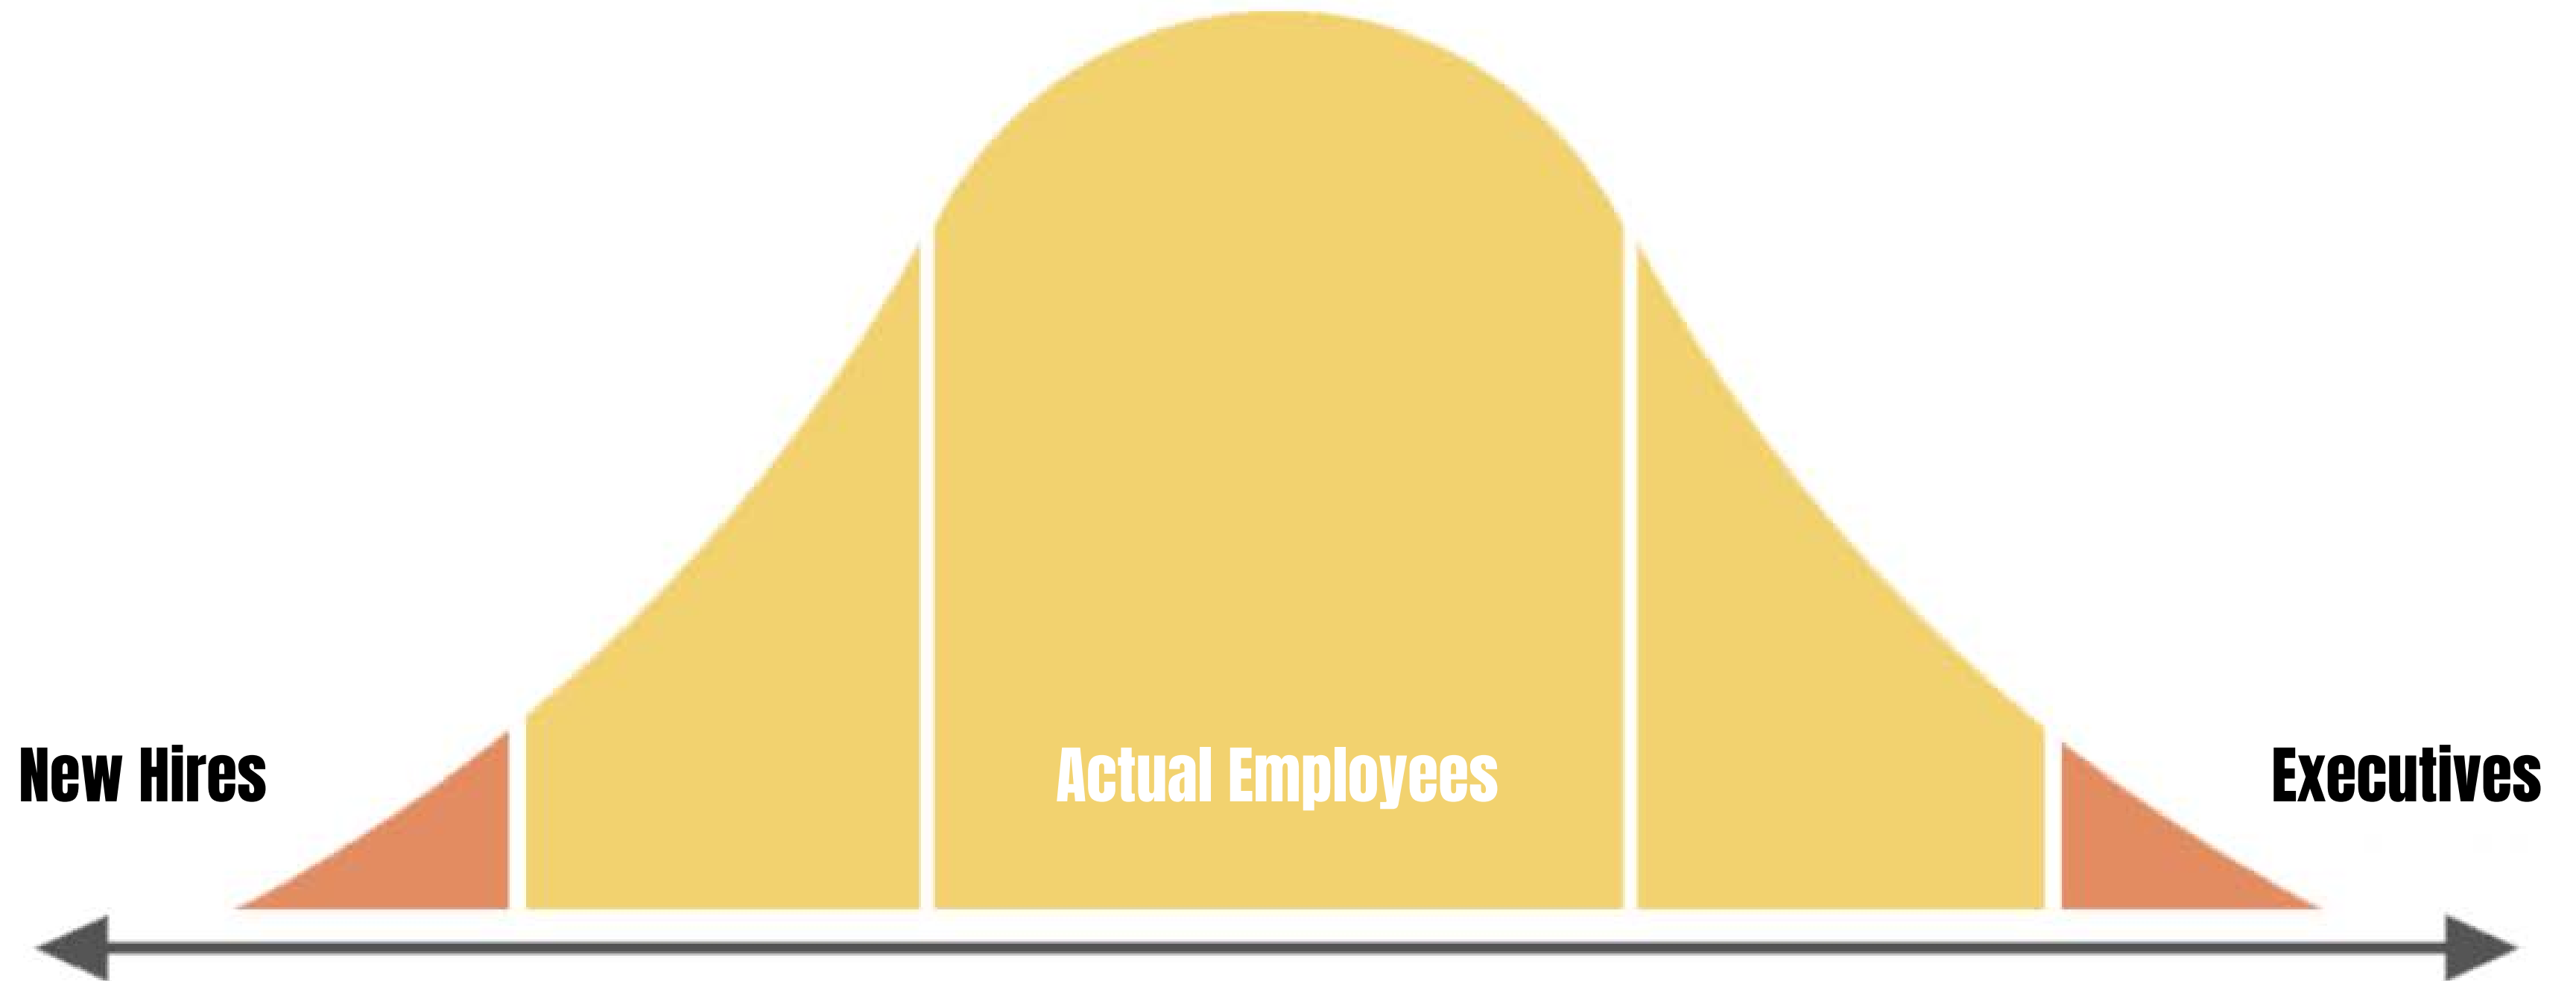

Problem 1:
We're thinking too
small—missing the gap.

Where Focus Tends to Go for Training

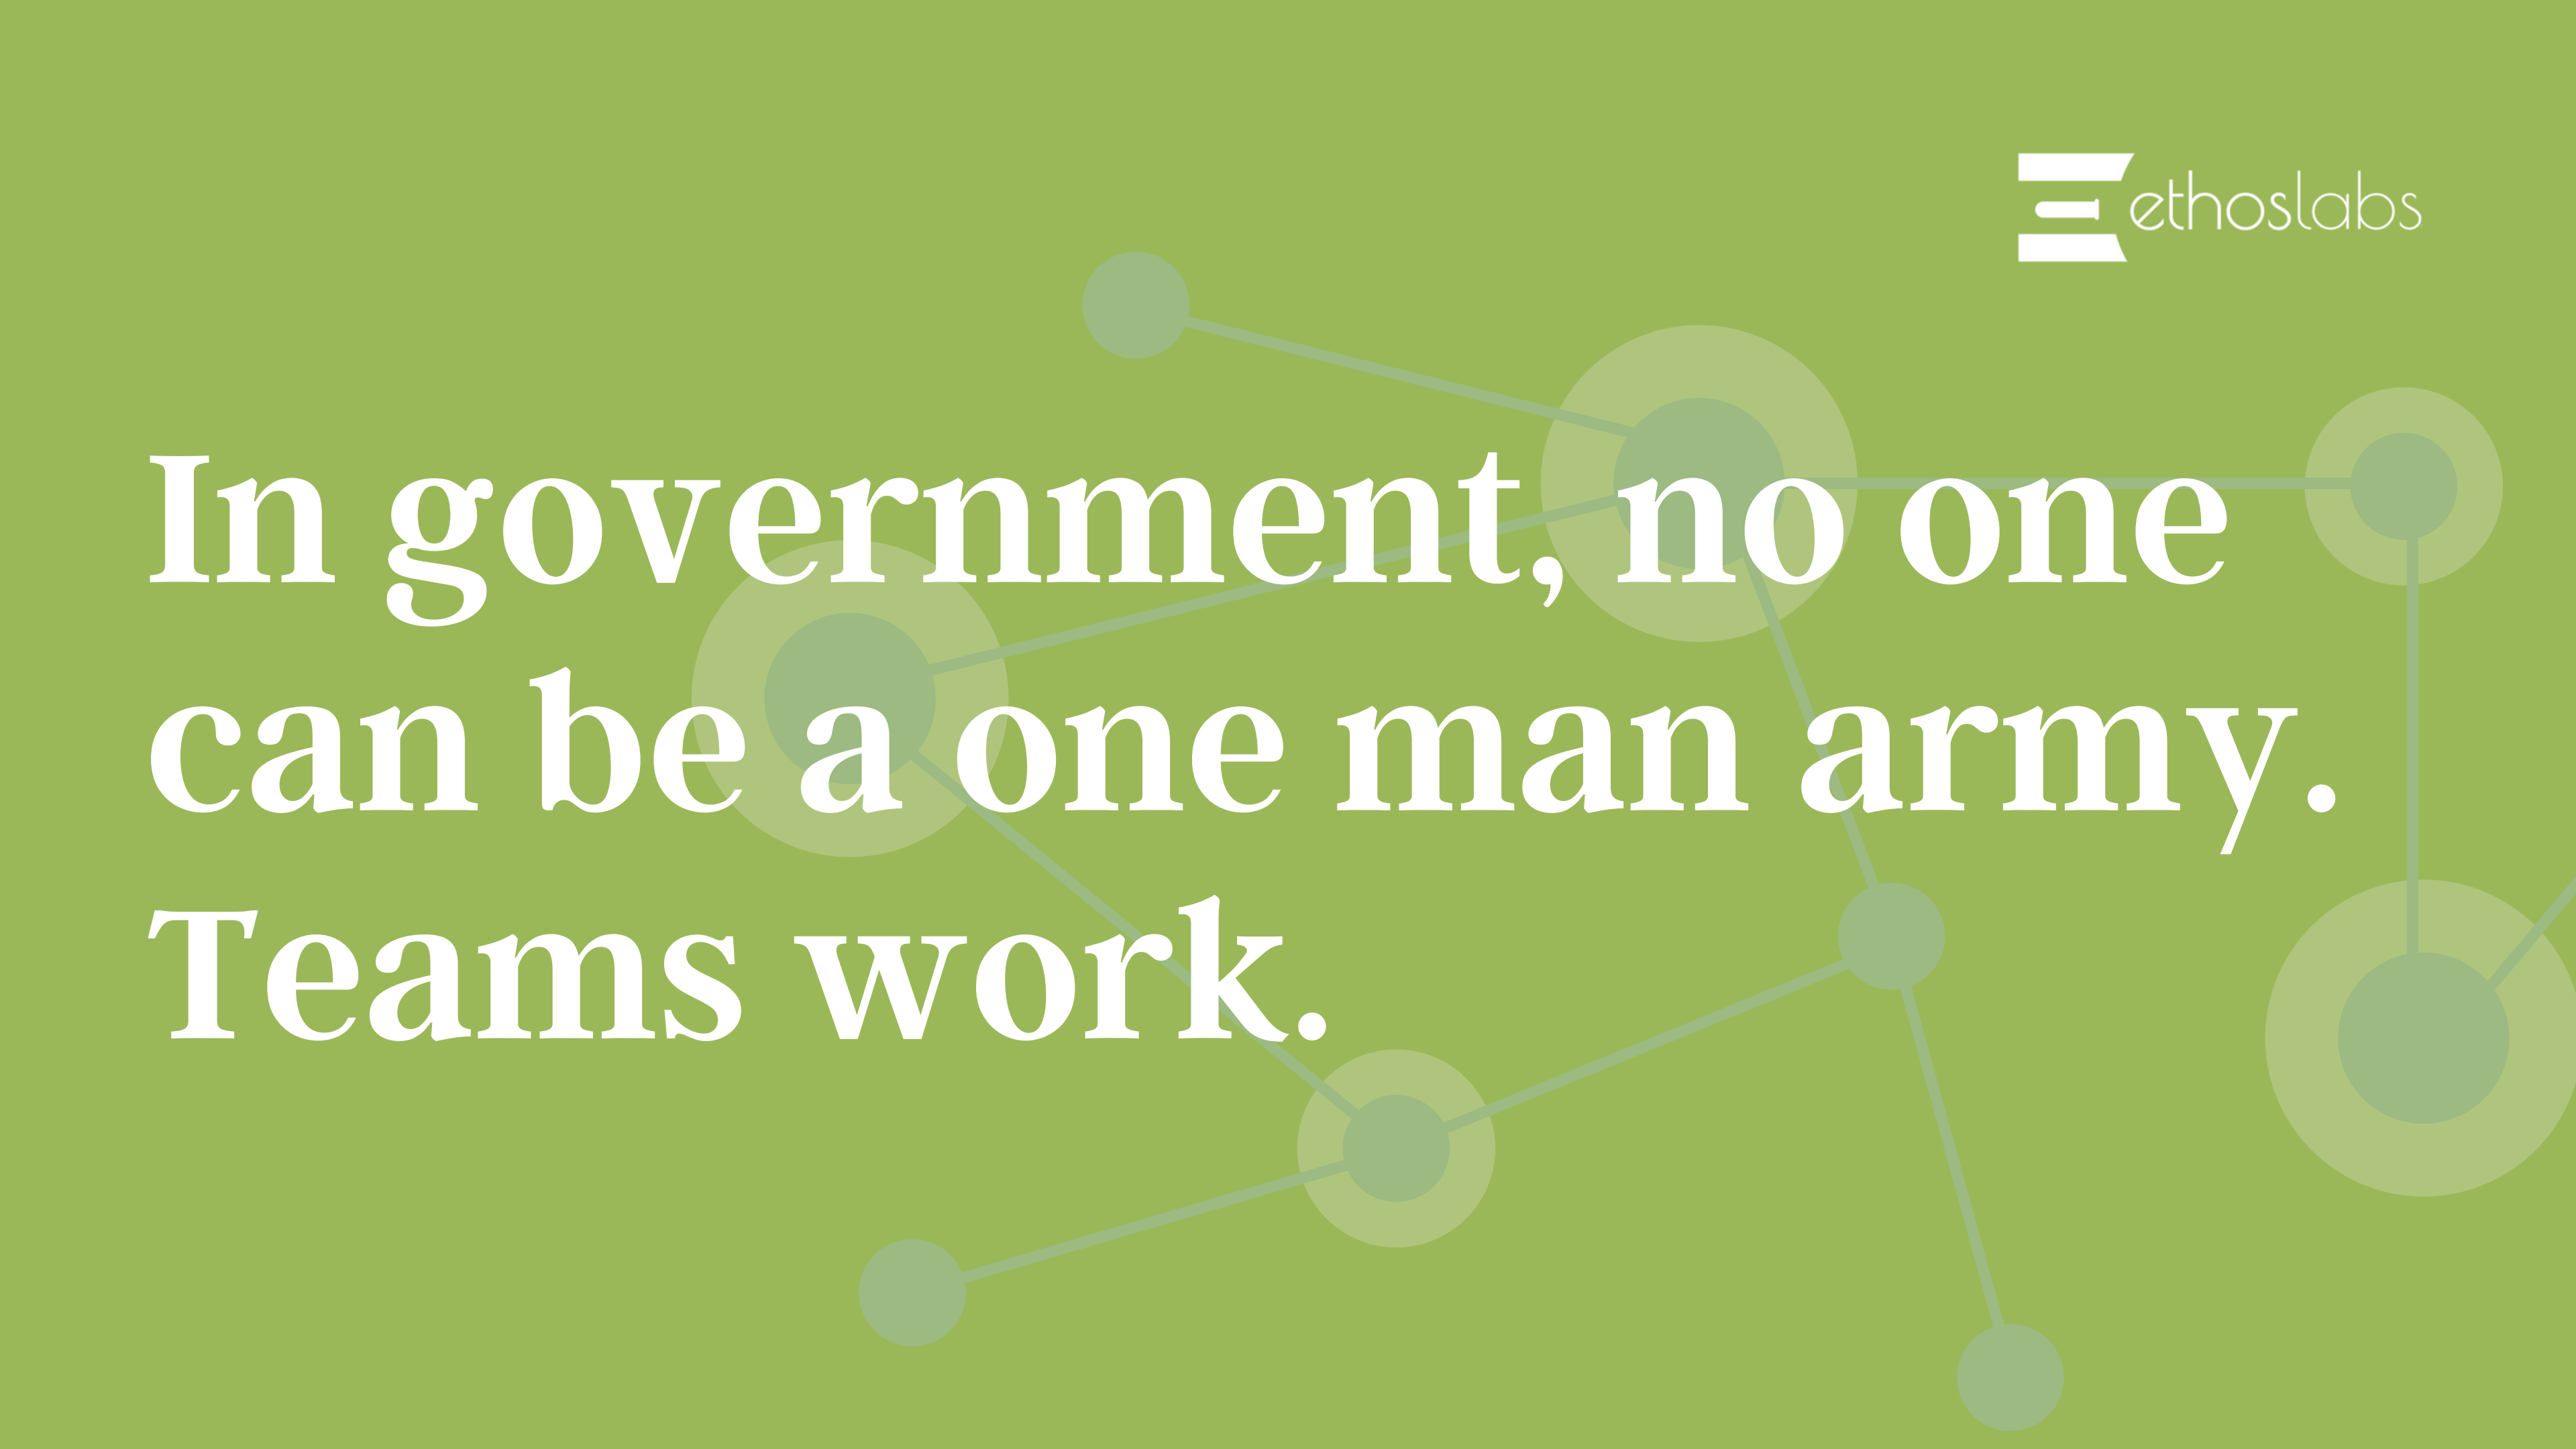

Where Focus Tends to Go for Recruitment

19.8 Million

State & Local

Government Employees

A network diagram with several nodes (circles) connected by lines, overlaid on a green background. Some nodes are larger and have a double-circle effect. The text is centered over this diagram.

In government, no one
can be a one man army.
Teams work.

What you can do:
Invest in local
leadership development
& recruitment.
